LinkedIn

Summary:

Experienced Cyber Security Engineer Proficient in conducting security assessments, vulnerability assessments, GRC with good understanding in ISO 27001 and penetration testing with expertise in Comptia N+, EWAPT, EMAPT, OSCP certifications and certified EJPT.

Skilled in programming and problem solving with Python, C++, Java, and Bash scripting. Actively engaged in ethical hacking communities such as Hack The Box and Try Hack Me, with a track record of completing PortSwigger labs and participating in bug bounty on platforms like HackerOne and Bugcrowd.

Skills:

Knowledge of common attack vectors and exploitation techniques, such as SQL injection, XSS, CSRF, etc.

Experience with operating systems such as Linux, network security, and security testing tools such as Burp Suite, Nmap, Metasploit, Sqlmap, etc.

Programming and scripting with Python, C++, Java, and Bash scripting.

Strong communication skills; ability to articulate technical issues and findings to both technical and nontechnical audiences.

Experience:

Hacktify Cyber Security - Internship

[Information Technology & Services] [Mumbai]

[Feb 2024 - Mar 2024]

Exploit vulnerabilities like ssrf, csrf, idor, xss, html injection, and clickjacking.

CTFs like OSINT, cryptography, network forensics, reverse engineering, and Web 2.0.

Education:

Bachelor of Science (BS), Computer Science, 2020-2024

[Arab Open University] | [Egypt]

Certifications:

- eJPT (eLearnSecurity Certified Junior Penetration Tester)

courses:

MCSA	ISO 27001
COMPTIA N+	Offensive Penetration Testing (Cybrary)
EWAPT	Penetration testing and ethical hacking (cybrary)
EMAPT	Cybersecurity For Beginners (ITI)
OSCP
